

Delivering Hazardous Area Inspection, Audit and Training

Petromod and Competency Training are combining forces to deliver professional, skilled and compliant workforces throughout Australia and internationally.

Petromod is a provider of electrical audit and inspection services for the global oil and gas industry, protecting people and assets during construction and production. Petromod offers Electrical Equipment in Hazardous Areas (EEHA) installation and inspection, greenfield and brownfield maintenance, and commissioning services.

Competency Training is one of Australia's leading Registered Training Organisations. As a provider of holistic site training and enabler of high performance workforces, Competency Training delivers high quality graduates to industry, and supports their career progression from start to finish.

Better Together

Together Petromod and Competency Training are meeting the challenge of delivering quality audit and inspection services, combined with Hazardous Area training, to Australian and international clients.

Harness real world experience through our customised solutions to deliver workers who are skilled and compliant for your worksite.

The Compliancy Offer

Petromod and Competency Training are jointly providing fully tailored on-site programs which deliver safe workplaces, and compliant workforces, to oil and gas facilities across Australia.

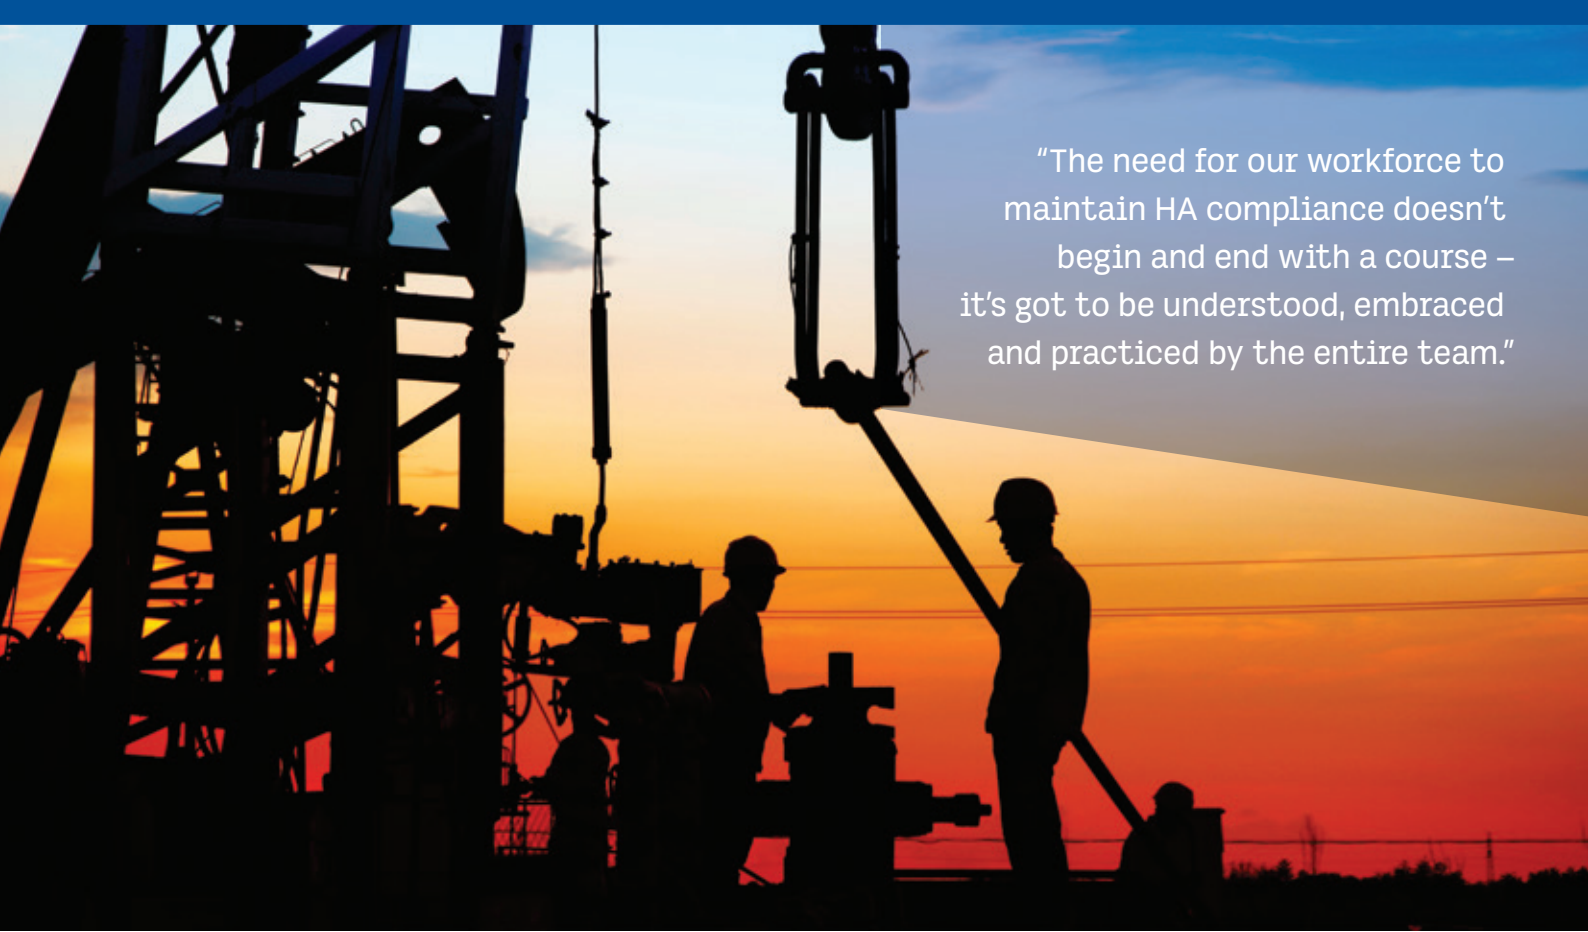

Our inspection services are equipped to identify issues during the installation phase, including instances where materials constructed offshore have not met with domestic inspection requirements.

The compliance package offered by Petromod and Competency Training layers audit services over inspections to identify training requirements and ensure workforces are fully qualified to operate equipment ahead of site commissioning.

These programs extend the learning from the classroom into the field, enabling companies to improve Hazardous Area and specialist training safety on individual sites.

The deliverables for clients include:

- A fully compliant workplace, meeting Australian EEHA safety standards.
- Substantial improvement in the client's ability to maximize productivity in a safer working environment.
- Cost effective and timely solution delivery, integrating inspection and audit services to ensure workplaces are fully compliant with Australian standards.
- On-site training and delivery of competencies and qualifications which minimise training downtime and cost, allowing clients to reallocate funding towards broader business objectives.

"The need for our workforce to maintain HA compliance doesn't begin and end with a course – it's got to be understood, embraced and practiced by the entire team."

Delivering Hazardous Area Compliance Solutions

Australian regulations place the onus squarely on companies to educate workers to recognized accreditation and competencies.

As solutions providers, Petromod and Competency Training focus on delivering the very highest standards to industry and educate workers to utilise equipment on site to recognised competencies.

"Through Petromod and Competency Training we have found a tailored solution for both our inspection and training requirements – we're confident that experienced inspectors are on-site mentoring our workforce to use our equipment and build on their knowledge."

Inspection solutions:

- A tailored approach for the oil and gas industries as a single source provider of inspection and audit services.
- Qualified inspectors who meet Competency Training's standards, and are up-to-date with the latest changes to regulations and legislation.
- Comprehensive support to deliver the highest industry standards in safety and compliance.

Life-cycle training solutions:

- Cost effective training solutions delivered on time and to budget.
- Professionally and seamlessly delivered world-class education to meet changing challenges in the oil and gas industry, and to minimize training downtime.
- Companies can introduce new equipment to their workforce, confident they are appropriately skilled and meet certifications.

Meet the compliant workforce challenge

We audit, inspect and train industry compliant workers across Australia and internationally.
